SCOPE OF SERVICES

On-Call Construction Management and Inspection Services by Green Valley Consulting Engineers for the University District Project

Scope of Services

Task No 1 - Pre-Construction and Initial Construction Activities

Green Valley's pre-construction services will include logistics, coordination, and meetings with the Contractor, City, utility companies, and other project stake holders. It is our understanding that the Construction Manager will be responsible for leading the meeting. Additional services to be provided at this stage include:

- Pre-construction digital photos of the project site
- Set up the project files in accordance with the City's standard formats for administration
- Development of written and verbal communication protocol (and associated forms) with the Construction Manager and City Staff

Task No. 2 – Daily Field Inspection & Documentation

Green Valley will provide daily, on-site inspections of the construction activities to ensure that the contract work conforms to the contract documents and Governing Construction Standards. The on-site inspector will provide documentation of the work on daily inspection reports. Daily inspection reports may be submitted to the City on a weekly basis for the previous week's work. Green Valley will also document the work in progress with digital photos. Other important tasks of the on-site inspector include public relations and safety measures, especially traffic control measures during construction.

If requested, our Inspector will confirm that all design permit requirements are met and will act as the liaison between the Contractor, Construction Manager, and other stakeholders. Specifically, we can assist with the following work:

- Measurement of work, pay requests, change order support, and related contract issues
- Preparation and processing payment recommendations to the City using Microsoft Office formats
- Review of Certified Payroll reports
- Coordination of all required testing as specified by the Contract documents
- Quality Control/Assurance of construction approach and written communications

We know that documentation and communication is critical to the success of construction projects and we are committed to keeping the Construction Manager, City staff and other stakeholders informed regarding critical construction details, progress of the work and costs of the project. We will document all construction issues with the following reports:

- Progress Meeting Minutes
- Daily inspection Reports; Weekly statement of Working days
- Monthly Status Report

The Monthly Status Report will provide the City with information on construction activities for the month, change order cost summary, pay estimate cost summary and contract time summary.

Task No. 3 - Requests for Information (RFI)

The Contractor will be required to submit all Requests for Information in writing. The Inspector will work under the direction of the appointed Construction Manager to follow up as needed with the Contractor to clarify requests, obtain needed information and provide direction as required to proceed with the work.

Task No. 4 – Closeout & Record Drawings

We will work with the City and the Contractor to keep a “record set” of drawings to document changes and as-built conditions of original design plans. Once construction is completed to the satisfaction of the City, we compile all pertinent files and related information and submit to the City for their permanent records. We will furnish the City the following:

- Record drawings
- Project Photos
- All contract files and records
- Electronic files
